

# FOOD FOR BIODIVERSITY e.V.

With the association **Food for Biodiversity**, we, representatives of companies, associations and standards from the food industry and environmental protection, are making an ambitious statement: We want to make a decisive contribution to the **protection of biodiversity** and against the extinction of species.

## Our goals

The promotion, restoration and preservation of **biodiversity as the basis of food production** is at the centre of our work. Our members, including food producers and traders, standards and other industry players, scientific institutions and environmental organisations, are **committed to implementing measures** that anchor the protection of biodiversity in the food industry and its upstream value chains.

## How we promote biodiversity in the food industry

**Support for farmers** in the implementation of the criteria and measures

Resources to **raise awareness** among consumers

Advocacy for a biodiversity-friendly **policy framework**

Establish effective biodiversity **criteria** in purchasing and food standards

**Trainings** for employees, farmers, advisors, and auditors

Promotion of **research and pilot projects** on biodiversity

## Food for Biodiversity: Become a member!

Members enjoy the following benefits:

- **Support for legal reporting obligations** and voluntary reporting (e.g. GRI)
- **Provision of concrete tools for biodiversity protection** (Basic Set, Biodiversity Performance Tool, Biodiversity Action Plan, Biodiversity Monitoring System)
- **Trainings for managers** in your company
- **Member trainings**
- **Support** in the implementation of **pilot projects**
- National & international conferences as **information & networking platforms** for the entire sector
- Regular exchange with other members in various **working groups**

The association welcomes support from organisations in the food industry:

- Manufacturers, retailers, and their associations
- Suppliers, producer groups, and agricultural associations
- Standards and certification organisations

**Non-governmental organisations** and **institutions** from the fields of **science and education** committed to the protection and promotion of biodiversity in the food sector are also invited to become members. Furthermore, there is the possibility of **supporting memberships** for organisations committed to the aims of the association.
